

Book Arts with Betsy Holster

Learn the art of bookmaking with Cal State Fullerton Professor Betsy Holster! In this one day workshop, students will learn to make three different styles of books - so everyone will have three different books to take home! Bookmaking is not nearly as difficult as it looks - anyone can learn to do it. In fact, you will have so much fun that you may become addicted! Once you have made the three book structures taught in this class, you will have no trouble using materials at home to continue making more and more books!
